

HUNTER WILDLAND FIRE SAFETY TIPS

During periods of dangerous fire conditions it is extremely important to check with local fire agencies for current fire restrictions. These restrictions may be different at your hunting destination. The following are fire safety tips to help you enjoy your sporting activity and protect our natural resources.

Camp or Warming Fires: If allowed, do the following:

- Keep camp or warming fires small
- Build camp or warming fires away from overhanging branches, steep slopes, dry grass, logs, and rotten stumps
- Never leave a camp or warming fire unattended
- Drown and stir the fire with water until dead out
- When finished with charcoal briquettes, dunk them
- Remember -- just because there is no smoke, doesn't mean the fire is out.

Smoking: If allowed, do the following:

- Safe practices require at least a 3 foot clearing around the smoker
- Crush smokes, dead out
- In a vehicle, use your ashtray

Equipment: If allowed, do the following:

- Internal combustion equipment requires a spark arrester. Check with your local dealer or fire agency to make sure you are legal
- Don't park your vehicle on dry grass
